

ENVIRONMENTAL POLICY

Always aiming to protect the environment in the context of its activities, the company has developed and implemented an Environmental Management System in accordance with the requirements of ISO 14001:2015.

The company is committed to:

- continuous monitoring and control of compliance with environmental legislation.
- the systematic identification, evaluation and control of the environmental impacts resulting from her activities.
- the continuous improvement of its environmental performance through the development of new goals, objectives and programmes and the reduction of environmental pressures.
- informing and encouraging her staff for their active participation.

With the development of the Environmental Management System, the company identifies all environmental aspects related to its activities as well as measures and procedures to monitor all important environmental aspects.

The company's environmental policy focuses on:

- Proper management of her generated waste based on the requirements of the legislation giving priority to recycling.
- The prudent and rational use of natural resources, while minimizing the negative impact of her activities on the environment.
- Informing partners and customers on environmental issues.
- Life cycle of the product or service provided.

As a consequence of the above, the Company's Management is committed to her active participation in the implementation of the System and the provision of resources at every level (human – material – financial) that will contribute to its continuous improvement.

The company's current environmental policy is reviewed annually during the management review, published, disclosed, implemented and supported by all partners of the company.
